Tip of the Month: So often that space in the front entrance becomes the dumping ground for everything, resulting in some serious frustration. An easy solution to organizing this space is to use one of those cutlery trays that you find in your kitchen drawers (or a fancy wicker one if aesthetics are important to you). This gives you a functional storage solution; use one divider for keys, one for electronics such as your cellphone, the other for wallets and yet another for sunglasses (or whatever you need them for). Make nice cardboard labels that you can stick on the front of each divider. Easy and affordable!
